Safety Measures

District Office Outside Doors

Little Falls City School District is proud to showcase the many safety measures they have in place in order to keep our school safe! Our District Safety Team meets quarterly throughout the year and any time there is a pressing situation taking place to discuss our ever-changing safety measures.

District-wide we have over 135 high-quality security cameras watching and recording inside and outside continuously. All exterior doors are locked at all times. To gain access to the interior of the school you have to show your ID as well as have an explanation as to your reason for entry. If you do not have your ID, you will not be allowed access to the building. Once buzzed into the school, you will remain in the vestibule, not having access to any students or faculty. If you must enter the school offices, you will need permission from a school administrator. All windows on the ground and first floor are locked. During instructional time all classroom doors are closed and locked.

Security camera footage of cafeteria doors

Little Falls City School District collectively works with the Little Falls Police Department allowing our schools to have school resource officers (SRO) in the buildings all day and also outside for recess and dismissal. The pictures shown here give an example of the high-definition security cameras the district has in place. These cameras are also continuously monitored by our SRO.

In addition to these school safety protocols, the Technology Department has systems continually monitoring student and faculty devices for any alarming content or behavior and, in turn, alerts the appropriate faculty and staff to address any situation as needed.
